Jorge Ernesto Nicho Galagarza

B.Sc. Computer Science UTEC

jorgenicho.com linkedin.com/in/jorgenicho jorge.nicho@utec.edu.pe jgalagarza12@gmail.com (+51) 960587849

Education

Pontificia Universidad Católica del Perú August 2026
AI Winter Camp PUCP

Universidad del Pacífico May 2026
AI Applied

Universidad de Ingeniería y Tecnología - UTEC July 2024
B.Sc. Computer Science

Relevant Coursework

Courses: Artificial Intelligence (CS2601), Software Engineering (CS2901, CS2902), Programming (CS1100, CS1102, CS1103), Internet of Things (CS3P03), Computer Security (CS3I01), Human Computer Interaction (CS2H01), Advanced Algorithms and Data Structures (CS2100, CS2102, CS3102), Competitive Programming (CS3101), Operating Systems (CS2S01), Discrete Mathematics (CS1D01, CS1D02), Physics (ME0019, EN0021), Statistics & Probabilities (IN0054), Bioinformatics & Biostatistics (BI0025)

Skills

Languages: C/C++, Python, R, SQL, PySpark, Java, JavaScript, LaTeX.
Tools: Git/GitHub, Unix Shell, VS Code, Jupyter, Excel, Power BI, Looker, PostgreSQL, Linux.
Frameworks: TensorFlow, Flask, FastAPI, Airflow, MLflow, Scrum, Design Thinking, Playfulness Design.
Libraries: Pandas, PySpark, Scikit-learn, PyTorch, SciPy, NumPy, Seaborn, Matplotlib, Airflow, Openpyxl, SendGrid.
Cloud: Google Cloud Platform (GCP), Amazon Web Services (AWS).

Experience

Data Science Specialist | Mibanco - Credicorp
Python, Scikit-learn, Azure, Databricks, Excel Feb. 2026 - Present

- Built AI agents to automate compliance processes, saving up to 4,000 person-hours per year.
- Built and monitored compliance models for anomaly detection and segmentation for AML/CFT (anti-money laundering and counter-terrorist financing). Achieved 92% alert effectiveness and approval from multiple auditors.
- Built, monitored, and audited fraud detection models in line with regulatory requirements. Achieved 85% alert effectiveness and approval from multiple auditors.
- Deployed models to production on Databricks and built Power BI dashboards to report business results.

AI Researcher | UTEC
Python, PyTorch, Scikit-learn Jan. 2026 - Present

- Nicho Galagarza, J., et al. — Multimodal Wearable-Based Stress Detection Using Classical Machine Learning and Deep Temporal Architectures. CISTI. UTEC, Lima. Automatic stress detection from wrist-worn sensors (EDA, pulse, and temperature) on the WESAD dataset. We compared classical models against deep neural networks under a subject-wise protocol with no data leakage; the best model achieved 95% balanced accuracy.

AI Engineer | Real Plaza - Intercorp
Python, Scikit-learn, Prophet, GCP, Excel Jan. 2025 - Feb. 2026

- Member of the 9th cohort of InGenia, Intercorp's program for academically outstanding graduates who seek to make a strong impact on challenging projects.
- Developed recommendation models, generative AI (LLM) solutions for document classification and document understanding, forecasting and churn models, leveraging AI services on GCP. Built dashboards for AI projects, presented to senior management, and delivered AI Culture training to business teams. Saved up to 1,000 person-hours per year.
- Deployed to production with Cloud Composer (Airflow). Cleaned up and optimized BigQuery queries.
- Placed 3rd out of 11 teams in the Intercorp Group and Google hackathon, representing Real Plaza.

Senior Data Analyst | Overall
Python, Spark, SQL, AWS, Power BI, MLflow, Excel Aug. 2024 - Dec. 2024

- Managed data science projects for the retail sector based on time-series predictive models for demand forecasting. Scope included requirements documentation, data loading, analysis and preprocessing, model development, results visualization for technical and business teams, and production deployment on AWS. Achieved 90% effectiveness, including model explainability.
- Performed data analysis in Python for multinational technology and consumer goods brands in the retail sector (Lenovo, Gloria, Xiaomi, HP, Acer, Samsung, Sancela, etc.). Visualized results in Power BI.

- Audited data, data homologation (matching) algorithms, and image recognition models already in production.

Data Analyst & Growth Intern | Fitco
Python, SQL, GCP, AWS, Shell, Looker Dec. 2023 - Aug. 2024

- Built classification and time-series forecasting (AI) models to predict customer churn and its monthly financial impact. Implemented retention strategies (within Growth) to ensure customer success.
- Created a customer health classification and, based on customer activity, defined their platform usage status. Also determined when customers should move from the onboarding process to become established clients.
- Project Owner for managing SaaS data migration from multiple platforms.

Data Science Intern | Ransa
Python, SQL, GCP (Cloud Storage, BigQuery), Power BI, Jupyter Notebook, Excel Jul. 2022 - Apr. 2023

- End-to-end (E2E) demand forecasting project for mining resources, covering data extraction, modeling, descriptive analysis, testing, and deployment. Advanced analytics models: ARIMA, SARIMA, XGBoost, NeuralProphet, LSTM. Achieved 85% effectiveness across multiple time series.
- Performed descriptive and predictive analyses to turn data into dashboards with logistics KPIs for banking and mining clients.

Awards and Volunteering

Hackathon Awards | *Participant* 2026
Competed in 3 agentic AI hackathons and reached the podium every time: 3rd place at the Intercorp InRetail hackathon, 3rd place at the PUCP AI Winter Camp hackathon, and 1st place at the hackathon of the Pan American Federation of Engineering Societies (UPADI), together with the Colegio de Ingenieros del Perú. Also served as a mentor at the UNI Software Week.

Fundación Educación Scholarship (Peru - Switzerland) | *Scholarship Recipient* 2020
Educational support for my undergraduate degree in *Computer Science*.

Half Scholarship - UTEC & BCP | *Scholarship Recipient* 2020
Financial support during COVID-19, under which 50% of the semester was covered by UTEC and another 50% by Banco de Crédito del Perú (BCP).

Half Scholarship - "Leadership in an Age of Disruption" Program, CSUN & IBS | *Scholarship Recipient* 2020
Admitted to the leadership program at California State University, Northridge.

Certifications

Coderhouse 2026
AI Engineer Specialization

Data Science Research Perú 2026
AI Governance Specialization

DataBank Academy 2026
Machine Learning and MLOps in Credit Risk

DataBank Academy 2026
GeoAnalytics for Credit Risk

Udemy 2026
LangChain - Develop AI Agents with LangChain & LangGraph

Británico 2022
English B2

Google 2022
Data Analytics Professional Certificate

Columbia University 2022
Statistical Thinking for Data Science and Analytics

Columbia University 2022
Machine Learning for Data Science and Analytics

Stanford University 2020
Data Science Short-Course
